

Đieu Thành Đạt

DV18CLC

1851030104

Câu 3:

```
SELECT a.cust name AS "Customer Name",  
a.city, b.name AS "Salesman", b.commission  
FROM Customer a  
INNER JOIN salesman b  
ON a.salesman id=b.salesman id  
WHERE b.commission>.12;
```

The image shows a handwritten version of the SQL query from the previous block on a piece of lined paper. At the top, the student's name 'Đieu Thành Đạt', ID 'DV18CLC', and phone number '185 103 0104' are written. Below this, the question number 'Câu 3:' is written. The SQL query is then written in cursive script, matching the typed version above. There is a small correction in the WHERE clause from '.12' to '0.12'.

```
Câu 3:  
SELECT a.cust name AS "Customer Name",  
a.city, b.name AS "Salesman", b.commission  
FROM customer a  
INNER JOIN salesman b  
ON a.saleman id = b.salesman id  
WHERE b.commission > 0.12;
```
